
Mutually incoherent, shift-invariant imaging: I_image = throughput x (I_object * unit-energy PSF). Image relative L2 error = 0.0003785
Input object intensity (own logarithmic scale)
Object intensity (arbitrary units)
Ideal: equal layers
Image intensity (common scale)
Thickness deviation
Zernike complex-pupil fit
Reconstructed minus true image
1e−7
Intensity difference
Cross section at s_y=-1.5
Ideal: equal layers
Thickness deviation
Zernike complex-pupil fit
Image intensity
s_x
