Mutually incoherent, shift-invariant imaging: I_image = throughput x (I_object * unit-energy PSF). Image relative L2 error = 0.004493
Input object intensity (own logarithmic scale)
Ideal: no surface error
True surface error
Reconstructed image
Reconstructed minus true image
Cross section at s_y=-1.5
s_x
s_y
Object intensity (arbitrary units)
Image intensity (common scale)
Intensity difference
Image intensity
Ideal: no surface error
True surface error
Reconstructed image
